

NSW SES Safe Decisions Commitment Project

Making safe decisions during floods and storms can save lives and prevent loss or damage.

- I commit to making safe decisions when preparing for, responding to and recovering from floods and storms
- I will make safe decisions that save lives and protect people, animals and property
- I commit to finding out about safe actions before, during and after floods and storms
- I will champion safe decision making in my community, my networks and my connections
- I give permission to the NSW SES to publish this commitment (you can request this to be changed in the future by completing the [Alteration of Personal Records Application](#)) and your name will be removed from the Commitment form.
